

THE EXPO

3CDSE 2018 is unique amongst other defence and security expos, in that it offers business to business networking with key decision-makers.

It includes a day-long programme of expert speakers and workshops and a major exhibition.

Following on from the success of the first Herefordshire showcase for the defence and security industries, the Expo has substantially grown.

3CDSE still maintains its original premise to provide a forum for military, suppliers and security agencies to identify common interests, solutions and opportunities.

PARTNERS

INNOVATION

The 3CDSE 2018 theme is Innovation, with a focus on cyber security, hardware and vehicles, UAV and counter-UAV technology, C4IS (communications), export finance and military procurement.

EXPO ZONES

The main 3CDSE 2018 Expo will include a range of exhibitors specialising in the defence and security sector, which will be divided into our four main Zones; Cyber Security, C4IS (Communications), UAV & Counter-UAV and Hardware & Vehicles

PROGRAMME

3CDSE 2018 will include a day long programme, hosting various speakers, panel presenters and workshop facilitators, presenting on the following topics:-

- Military Procurement
- Export By Region
- Export Finance
- Supporting SMEs
- Cyber Security
- UAV & Counter UAV
- Hardware & Vehicles
- IT & Communications
- Border Control/Security

THE GOLDEN TRIANGLE

The Three Counties of Herefordshire, Worcestershire and Gloucestershire comprise the hub of the UK's defence and security industry – the "golden triangle" – with:-

- MoD Hereford
- Qinetiq and the Malvern Cyber Cluster in Worcestershire
- GCHQ in Gloucestershire and all the satellite industries which have grown up around them

“Many sources record that 90% of the UK's defence and security innovation has its home in this triangle”

WHY 3CDSE?

3CDSE brings together senior military leading forces development and procurement, senior police engaged in the fight against cyber-crime, the intelligence and security agencies, and the industry innovators who supply them, to identify future strategies and needs.

Unlike many larger and established events, this is an opportunity to engage with those at the cutting edge of the defence technology coal-face and real decision makers in the industry.

3CDSE is the "go to" event for primes and SMEs alike, recognising the growing need for agility in this sophisticated supply chain and streamlined, efficient and cost effective R and D and procurement

It is a closed "industry only" event geared to genuine commercial activity and growth.
